

1. Yes to life, no to deviance and excess

Life should be lived in its fullness, with lucidity and motivation. Deviance and excess are an escape from reality, a way of clouding the mind and of seeking pleasure as an end in itself. The Legalife Movement aims to promote a culture of life made from passions, interests and sharing.

2. Awareness

Correct information for families and adolescents on the physical and psychological damage caused by marijuana. The movement also aims to divulge scientific evidence on the dangerousness of narcotic substances.

3. Education

Combating the message of total permissiveness with regard to the culture of deviance and excess. Education calls for understanding, but also for rules, points of reference, examples and constructive proposals.

4. No to legalization

Legalization is not the only possible answer to the diffusion of cannabis. The movement intends to oppose the wave of anti-prohibitionism, unmasking false beliefs on the benefits of legalization.

5. Actions

The movement plans to develop its activities throughout Italy with a series of activities and initiatives intended to sensitize public opinion and to promote campaigns of prevention. The movement also aims to participate in the international debate to defend existing international conventions on drugs.
